Objective

Aspiring to leverage my expertise as a Full Stack Web Developer in a prestigious organization where I can tackle challenging projects and contribute to innovative solutions using Next.js, React, TypeScript, JavaScript, MongoDB, and PostgreSQL.

Summary of Job Experience

1. Service Center In-charge (BPS-17)

Punjab Land Record Authority (Government Sector)

Since February 24, 2014 – Present

Responsibilities

- Spearheaded full-stack web development projects, utilizing modern technologies:
- Frontend: React, Redux Toolkit, TypeScript, JavaScript, Tailwind CSS, HTML.
- Backend: next-auth, Node.js, Express, TypeScript, MongoDB, PostgreSQL.
- Framework: NodeJS, Express
- Managed office administration tasks and led a team of 20 members at the tehsil level.
- Fostered strong customer relations through effective communication and support initiatives.

2. .Net Developer

Allied Bank Ltd.

May 15, 2012 – February 14, 2014

Responsibilities

- Developed full-stack applications utilizing .NET MVC, Restful web Services, React, Crystal Reports, JavaScript, jQuery, SQL Server, and Oracle.
- Proficient in Microsoft SharePoint Technologies and Nintex Workflows for interoffice collaboration.
- Demonstrated expertise in financial applications and inventory automation systems.

3. Executive BSS

Wi-Tribe Islamabad

September 10, 2011 – May 10, 2012

Responsibilities

- Developed advanced Java applications and SOAP-based web services for bill payment processes.

Project Highlights

My Portfolio	https://alrehmanai.netlify.app/	Built with Next.js, React, and TypeScript, it features a sleek design using Material UI and dynamic animations with Framer Motion. Explore my projects, skills, and achievements in an interactive environment.
Online Food Ordering	https://alrehmanai-food-ordering.vercel.app/	I developed an e-commerce website for food ordering, featuring seamless Stripe integration for secure payments. Users can easily log in, update their profiles, and manage their orders. The admin has comprehensive control to oversee all orders and users, with powerful reporting tools for monthly revenue analysis.
Tech Stack	PostgreSQL, Mongo DB, NextJS
